XGILITY

Leveraging Technology In Times of Crisis & Beyond

SOLUTIONS FOR YOUR GOVERNMENT AGENCY & WORKFORCE

Due to the ongoing COVID-19 pandemic, federal agencies along with state and local governments around the country are undergoing a rapid digital transformation to ensure their workforce and remote workers have the right technologies to continue providing critical citizen services remotely – especially during uncertain and changing circumstances.

Empower Your Agency with Cloud & Mobile Solutions

Government IT organizations are under immense pressure. Not only do they need to provide the right tools to keep their employees productive and secure as they telework, but the pandemic has led many IT departments and government leaders to take a hard look at the services they can enhance through technology – while facing changing priories, limited resources, and tight budgets.

To help overcome those challenges, many are turning to Microsoft 365 (including Microsoft Teams, OneDrive for Business, SharePoint Online, Intune, and Security & Compliance tools), the Microsoft Power Platform, and Azure to ensure business continuity and operational agility – while building a solid digital foundation for the future – so their staff and remote workers can remain productive, informed, and secure while seamlessly providing responsive services to their citizens.

> Although technology alone is not the answer, it can play a powerful role in providing the right tools and data to meet their mission and serve citizens better – in times of crisis and beyond – especially as local and state governments continue to work remotely for the foreseeable future.

That's Where Xgility Comes In

Our team can help identify new ways that technology can support your staff and citizen engagement. Then develop a strategy to plan, build, and optimize solutions to meet the unique needs of your agency – and drive your business goals forward in a cost-effective and timely way.

We help transform the way government agencies do business with Microsoft Enterprise platforms and technologies including Microsoft Office 365, Microsoft Teams, Security & Compliance Tools, Power BI, PowerApps, Power Automate, and Azure.

. . . .

Solutions to Help Respond, Adapt & Transform

- **Empower Your Remote Workforce with a Secure, Virtual Workplace Using Microsoft Teams**

- **Secure & Protect Your Devices, Apps & Data**

- **Streamline Processes with Mobile Apps & Workflows**

- **Make Informed Decisions with Data Tracking & Dashboards**

- **Provide Responsive Services to Citizens with Virtual Agents & Chatbots**

- **Help Your Offices Reopen Safely with Back to Work & Scheduling Applications**

Our Expertise

Our team of experts are problem-solvers who understand both business and technology within the public sector. By leveraging our people, proven methodologies, agile processes, and deep knowledge, we help government agencies with their unique business and technical challenges and goals.

Your Trusted Partner for End-to-End Solutions

As your strategic partner, we will gain a comprehensive understanding of your agency and departmental goals, determine the right combination of technologies and solutions to help you optimize your environment to ensure maximum productivity and results.

Our Approach

We look at success through a different lens. Experience has taught us that strategic planning and execution are key for a successful implementation, rollout, and higher end-user adoption. That's why we start with a strategic approach, so we understand the "why" of each project.

CARES ACT Funding

We can partner with government agencies who have received CARES ACT funding to deliver critical COVID19-related solutions and services.
