

TRANSFORM CHALLENGES INTO OPPORTUNITIES

Leverage Cloud Technologies to Increase Operational Agility & Accelerate Your Mission During Challenging Times & Beyond

The COVID-19 pandemic has forced associations to rethink how they operate, work together, engage with their members and communities, and carry out their mission. But it has also provided a unique opportunity to transform.

Empower Your Association with Cloud Solutions

Digital transformation is more urgent than ever – not just to fix broken processes and solve pain points but to ensure business continuity, operational agility, and flexibility to quickly meet changing needs while building a solid digital foundation for the future.

By leveraging cloud and mobile technology, you can empower your workforce with the right tools and processes so they can work together more securely and efficiently, communicate with people both inside and outside your organization, drive collaboration and productivity, make data-driven decisions, and increase operational agility.

Although technology alone is not the answer, it can play a powerful role in providing your employees with the right tools, processes, and insights so they can carry out your organization's mission and accelerate impact in times of crisis and beyond..

That's Where Xgility Comes In

At Xgility, we are helping our association clients respond to unprecedented challenges, rebound effectively, and reinvent ways of working in these challenging times. Our team can help strategically plan and implement the right combination of technologies and solutions to meet the unique needs of your association — and drive a significant change in your organization's efficiency and impact.

We help transform the way associations do business with Microsoft Enterprise platforms and technologies including Microsoft Office 365, Microsoft Teams, Security & Compliance Tools, Power BI, PowerApps, Power Automate, Dynamics 365, and Azure.

Solutions to Help Respond, Adapt & Transform

- Empower Your Remote Workforce to Meet, Communicate & Collaborate in Secure, Virtual Workplace with Microsoft Teams
- Secure & Protect Your Devices, Apps & Data
- Optimize Operations and Streamline Processes with Mobile Apps & Workflows
- Make Informed Decisions with Data Tracking, Dashboards & Visualization
- Help Your Employees Safely Return Onsite to Work with Back to Work & Scheduling Applications

Our Expertise

Our team of experts are problem-solvers who understand both business and technology. By leveraging our people, proven methodologies, agile processes, and deep knowledge, we help your association's unique business and technical challenges and goals so you can accelerate your impact.

Your Trusted Partner for End-to-End Solutions

As your strategic partner, we will gain a comprehensive understanding of your business goals, find the right mix of technologies and solutions to help you get there, then optimize your environment to ensure maximum productivity and results.

Our Approach

We look at success through a different lens. Experience has taught us that strategic planning and execution are key for a successful implementation, rollout, and higher end-user adoption. That's why we start with a strategic approach, so we understand the "why" of each project.

ABOUT XGILITY

We are passionate about helping organizations of all sizes achieve transformational results using Microsoft enterprise cloud technologies and platforms including Office 365, SharePoint, Microsoft Teams, Dynamics 365, and Azure. Founded in 2011, Xgility works with commercial, government, associations, and nonprofit clients to solve their complex technical and business challenges. Our people, culture, and proven methodologies help drive our success so we can drive yours.
