Solutions To Drive Your Cloud, Business & Workplace Transformation

Transform and change with confidence. Let us help your organization rethink, reimagine, and transform how you operate, work, and collaborate for today and the future – while empowering your IT team and workforce to be more agile, productive, secure, and innovative along the way.

Using our strategy-first approach, our team will work closely with you and key stakeholders to plan, build, rollout, and optimize solutions that unify your technology and business goals and outcomes – while keeping your people at the center – to drive your transformation initiatives forward.

Strategic Planning, Change Management & Adoption

Successful transformation requires both strategic planning and change management. That's why our strategic planning and adoption methodology is both technical and user-centric. We engage with you and key stakeholders for critical planning and decision-making, then develop a strategic plan and actionable roadmap that fuses both technical solution decisions with traditional change management and adoption activities for all stages of your new technology initiatives to reduce the barriers to adoption and drive real change across your organization.

Collaboration, Productivity & Digital Workplace

Empower your employees with the right applications, processes, governance, and security for seamless collaboration, content management, information sharing, and communication to work securely in today's work anywhere environment while leveraging the Microsoft 365 ecosystem.

Business Processes, Workflows & Automation

Increase productivity and efficiency by modernizing legacy business apps and digitizing manual business processes with automation, bots, notifications, online or mobile forms, and electronic signatures.

Security, Compliance & Identity

Safeguard your people, devices, data, critical information, and infrastructure with a comprehensive approach to your cybersecurity strategy, policies, tools, and protection to keep your organization safe against today's security challenges and threats.

Cloud & Infrastructure

Move to the cloud, modernize your IT infrastructure, migrate and automate workloads, and transform business operations with the right cloud infrastructure that's agile, flexible, scalable, and secure – and that aligns with your business goals.

Application Modernization & Development

Transform your legacy and outdated apps, databases, and systems to modern, cloud-based apps or cloud-native services that are easy to maintain and secure.

- Support & Managed Services

Our Expertise

We help our customers move to the cloud, reimagine processes, modernize technologies and applications, and empower their employees with the right applications, insights, and guidance to work securely in today's work anywhere environment.

We leverage our expertise and solutions with Microsoft cloud technologies and platforms.

Our Approach

We look at success through a different lens. Experience has taught us that strategic planning and execution are key for a successful implementation, rollout, and higher end-user adoption. That's why we start with a strategic-first approach, so we understand the "why" of each project.

Your Trusted Partner for End-to-End Solutions

As your strategic partner, we will gain a comprehensive understanding of your technical and business goals, find the right mix of technologies and solutions to help you get there, then optimize your environment to ensure maximum productivity and results.

ABOUT XGILITY

We are passionate about helping our clients solve their complex technical and business challenges and achieve transformational results while maximizing their Microsoft technology and cloud investments. Founded in 2011, Xgility works with commercial, association, nonprofit, and government organizations of all sizes.
Our people, culture, and proven methodologies help drive our success so we can drive yours.

Take the Next Step

Let's talk about how Xgility can help you strategically plan, develop, rollout, and implement the right solutions you need to drive your business and technical goals forward.
